

Why Outsourcing Spam and Virus' Filtering is best for your Business

Filtering Spam and Virus' before they reach your network greatly increases your network security and productivity. There are a number of benefits that you will notice right out of the gate as noted below.

CudaMail™ is different than most E-Mail Filtering Services. We use Barracuda™ Spam Firewall technology with an installed base of over 70,000 servers. All of these servers report back to Barracuda Central (BarracudaCentral.org) and help to create the "Barracuda Reputation Block List" and monitor the Internet for trends in SPAM and Virus attacks. These lists and algorithms are maintained by Barracuda Central and updated "hourly" in our servers to ensure that SPAM gets quickly blocked, quarantined or tagged, after which the cleaned E-Mail makes it through to your E-Mail server.

Benefits:

- Block SPAM and Virus' e-mail threats before they reach your network.
- No hardware or software installation is required
- No Hardware or Software to maintain on your network
- No need for your staff to manage and maintain patches and updates
- No support contracts to worry about
- No need to update algorithms, server policies or rules
- Reduce bandwidth consumption, possibly lowering your Internet connection costs
- Decrease load on your email server
- Improve employee and IT administrator productivity
- Simple to implement (simple update of your DNS MX record)

We are sure the benefits listed above will not only save you time and money but will ensure you have the best possible protection for your network.

Did you know: 93% have had a virus, worm or other Trojan Horse successfully infiltrate their network through Email.

OSTERMAN RESEARCH, INC.

Filtering SPAM and Virus' before they reach your network greatly increases your network security and productivity.

A team of security engineers at Barracuda Central continuously monitors the Internet for trends in Spam and Virus attacks.

As they detect trends, Energize Updates are created and distributed to the CudaMail service and all Barracuda Spam Firewalls.

Each Barracuda unit at CudaMail is automatically updated with new Spam rules, Spam algorithms, and Virus definitions each hour.
